Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

- Claim I (previously presented): A system for visually mining information, the system being programmed to mine data from a structured information report for analyzing, and comprising:
 - a data mining module for mining data from the structured information report, the data mining module comprising:
 - a parameter obtaining sub-module for obtaining mining parameters and a scanning command; and
 - a querying sub-module for querying data from the structured information report in accordance with the mining parameters; and a dynamic scanning module comprising:
 - a scanning sub-module for scanning the structured information report;
 - an identifying sub-module for identifying whether data stored in a field of the structured information report match the mining parameters; and
 - a marking sub-module for marking an identified field of the structured information report with a designated mark.
- Claim 2 (original): The system as claimed in claim 1, wherein the data mining module further comprises a parameter setting sub-module for generating an SQL (Structured Query Language) sentence in accordance with the mining parameters.

10/749.311

Claim 3 (previously presented): The system as claimed in claim 1, wherein the scanning sub-module comprises a scanning needle for scanning each of the fields of the structured information report.

Claims 4-8 (canceled)
